Notice of CERCLA Five Year Review

A CERCLA Five Year Review is being conducted for the Naval Industrial Reserve Ordnance Plant (NIROP) Fridley, in Fridley MN, by the US Navy Southern Division NAVFACENGCOM. This will be the second Five Year Review - the first was signed in September 1998. The Record of Decision, signed in 1990, called for the hydraulic containment and recovery of all future migration of contaminated groundwater from the NIROP and the recovery, to the extent feasible, of contamination down gradient of the NIROP. The selected remedy included the installation and operation of groundwater containment and extraction wells with treatment and discharge of groundwater from the well system. The groundwater contamination is volatile organic compounds (VOCs), including trichloroethene (TCE). The community can contribute during the process by providing comments to the Navy. For more information, or to provide comments, please contact the Navy's onsite representative, Mr. Wayne Hanson (763) 572-6360. The schedule date for completion of the Five Year Review is September 29, 2003.
