Team –

I've reviewed the referenced document and submit the following VDEQ comments:

1. Excellent job writing this SAP, it is very clearly written and provides all pertinent information for review.
2. Worksheet 9-2 – The third sentence in the bottom paragraph does not indicate what will be done about that particular line of evidence. Should it say, "Specifically, the line of evidence stating the shallow aquifer would not be used for potable use because it is located in dredge fill and has low yield *should be removed OR should be included.*"

3. Worksheet 11, Investigation Approach and Types of Data Needed, fourth paragraph – The third sentence in this paragraph states, “The contingency event will include installation of temporary monitoring wells...”. For consistency and flexibility please change to, “...*may* include...”.

Thank you for the opportunity to comment.
