Subject: UXO-1 SI comments
Date: Tuesday, May 14, 2013 2:50:49 PM

Team, EPA has reviewed the UXO-1 SI . EPA concurs with the no further sampling recommendation.

The detections were low level, with only one exceeding the eco PAL. Also, there are non detect samples in close proximity to the locations where TNT was detected. If there was a significant issue there would have been a greater number of explosives detects in more samples.

Please let me know if anyone has any questions.

Thanks,

Bob

P.S. I don't think I will be at the meeting next week. It looks like I will have to call in.
