MEMORANDUM

To: NAS Pensacola Team
From: Allison Drew, RPM, EPA Region IV

AMO 3/25/94

Re: Designation of High-Priority Portions of Operable Units
40 - 42 (Bayou Grande, NASP Wetlands, Pensacola Bay)

OPTIONAL FORM NO. 1740		FAX TRANSMITTAL		1 of pages > 1

GEN 7000-01-017-7000		5000-101		GENERAL SERVICES ADMINISTRATION	

Pursuant to conversations with Joan Dupont, Ecological Risk Assessor, EPA Region IV, EPA proposes that the following portions of the subject OUs be prioritized for early investigation and remedy selection:

1. All wetland0 and drainage pathways/surface water bodies proximate to Site 1: Sanitary Landfill
2. All wetlands and drainage pathways/surface water bodies proximate to Site 30: Buildings 649, 755 & 648 and Site 11: North Chevalier Disposal Field
3. Arm of Bayou Grande proximate to the yacht basin
4. All wetland8 and drainage pathways/surface water bodies proximate to OU 10: Industrial Wastewater Treatment Plant
5. All wetlands and drainage pathways/surface water bodies proximate to Site 3: Crash Crew Training Area

The Remedial Investigations for these portions of OUs 40 - 42 should be initiated as soon as possible. Since these sites are likely to present a greater threat to human health and the environment than many of the sites currently included in Categories VI and VII, the Record of Decision (ROD) for these portion6 of OUs 40 - 42 should be finalized prior to the ROD for RI sites in Categories VI and VII if at all possible.
