Subject: Revised page inserts II for the Final Technical Memorandum for Reconnaissance Phase Flow Control Pilot Study Operable Unit 1, Naval Air Station Pensacola, Pensacola, Florida

Dear Ms. Marajh-Whittemore:

Tetra Tech NUS, Inc. is submitting this page insert for the Final Technical Memorandum for Reconnaissance Phase Flow Control Pilot Study, Operable Unit 1 at Naval Air Station (NAS) Pensacola, Florida. The page inserts are required based on an NAS Pensacola Partnering Team Discussion initiated by Tracie Bolanos of Florida Department of Environmental Protection to remove sentence "*If iron concentrations greater than the criterion are not detected, the recommendations of the subsequent Five-Year Review would be to discontinue monitoring at the POC and NFA.*" on Page 15. The NAS Pensacola Partnering Team agreed to delete the sentence to address FDEP's concerns.

Please use the enclosed pages and cover to replace the pages and cover in the Technical Memorandum document submitted on July 29, 2009. Remove pages 15, 16, and 17 and insert pages 15 and 16 enclosed. The revised electronic version of the document with the replacement page is enclosed.

If you have any questions, please call me at (850) 385-9866 ext 1362.

Sincerely yours,

A handwritten signature in cursive script that reads 'Gerald Walker'.

Gerald Walker, P.G.
Project Manager
