

ENVIRONMENTAL REMEDIATION SERVICES

SCOPE OF WORK:

Perform environmental remedial actions; removal actions; remedial design; expedited and emergency response actions; pilot and treatability studies; remedial action systems operation and maintenance; and other related activities associated with returning sites to safe and acceptable levels of contamination. Remedial actions may include, but will not be limited to capping landfills, pump-and-treat remediation, bioremediation, soil vapor extraction, natural attenuation, bioventing, air sparging, thermal treatment, phytoremediation, soil washing, and free product recovery. Perform services to operate, maintain, monitor, and optimize performance of remedial action systems including the implementation of monitoring plans. Types of remedial actions systems to be operated, maintained, and monitored may include but is not limited to: capped landfills, pump-and-treat remediation, bioremediation, soil vapor extraction, natural attenuation, bioventing, air sparging, reactive walls, thermal treatment, phytoremediation, soil washing, capped aquatic environments, storm water systems, and free product recovery.

ENVIRONMENTAL -- EXOTIC PEST PLANT SERVICES L

SCOPE OF WORK: Natural resource services to survey, map, and eradicate exotic pest plant species through chemical and/or mechanical means, and provide planning, research and analysis to predict and manage land use changes and effects in various locations in California, Nevada, and Arizona. Services may be performed in sensitive habitats that are subject to environmental regulations such as, but not limited to, the Endangered Species Act and/or Clean Water Act. The following components are included in this effort: botanical surveys; Geographic Information Systems (GIS) data collection and analysis; biological monitoring; proactive prevention of weed return and expansion through native plant community planning and restoration; analysis of the effects of military training and other land uses on natural resources at species, community, and landscape scales; and the use of this information to predict ecological trends and plan control efforts of exotic pest plant species
