- Manlift & MHE Forklift Training/Certification
- Street Sweeping
- Demolition Services

To request MVO services, customers should call the Dispatch Office at 474-6221 and provide their request along with a Job Order Number to pay for the service. Then the request can be scheduled.

Manlift Training Requirements

Every person operating or working off manlifts must be trained and licensed in the hazards that pertain to aerial work platform such as load capacity, height requirements, fall protection and other safety issues.

- Practical Training - is the hands-on portion of the program where trainees are shown the pre-use inspection, safe operating procedures, and parking/shut-down procedures. All trainees will then have the opportunity to operate the equipment and practice under the watchful eye of the program trainer in a safety controlled environment.

- Practical Evaluation - trainees are assessed to assure they have reached a minimum skill level and are individually evaluated using the equipment in a reasonably challenging course. Following this evaluation, trainees are de-briefed and given the opportunity to address any issues they may have regarding any phase of the program. Each successful trainee's will receive (his/her) license at the completion of their training.

Directions to NAVFAC Hawaii main BSVE Transportation Compound on Joint Base Pearl Harbor-Hickam (Pearl-side), Bldg. 35:

1. From Nimitz Gate proceed down South Avenue.
