Navy Awarded \$20.5 Million to Renovate AMC's Passenger Terminal in Hawaii

PEARL HARBOR-HICKAM, Hawaii – Naval Facilities Engineering Command (NAVFAC) Hawaii awarded a \$20.5 million firm-fixed-price task order under a multiple award construction contract April 27 to Insight Pacific LLC, a small business in Anaheim, Calif.

The work to be performed is for repairs of the existing two-story Air Mobility Command Passenger Terminal (AMC) at Joint Base Pearl Harbor-Hickam (JBPHH) and renovations to the in-bound and out-bound passenger processing so that it will comply with current codes, requirements and accessibility standards.

“This project not only increases the efficiency of a facility which serves 100,000 passengers a year; but will also improve the quality of life of everyone there,” said NAVFAC Hawaii’s Commanding Officer Capt. Dean Tufts. “The terminal is vital to Air Mobility Command’s missions which include worldwide cargo and passenger delivery, air refueling and aeromedical evacuation. NAVFAC Hawaii is honored to support AMC’s capabilities in the Pacific.”

The project is expected to be completed by March 2018.

Four proposals were received for this task order.
