Certifying Cranes Aboard De-Commissioned Floating Drydocks

Question: Which standard applies to wingwall cranes aboard decommissioned floating drydocks? Our cranes were formerly certified to NAVSEA Technical Manual (NSTM) chapter 589. The drydock and cranes are now Navy-owned, but contractor operated. Does the NSTM still apply or should the cranes be certified to P-307?

Answer: Cranes on naval vessels are not covered by NAVFAC P-307. Contact NAVSEA (Code 03P7) for requirement for these cranes.
