Re: SVE Soil Sampling Results
AOC 1A - MCB Camp Lejeune, N.C.

Dear Gena:

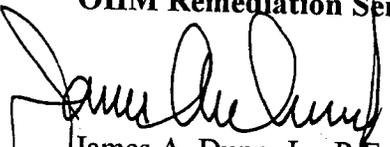

Attached please find a synopsis of the results of various sampling events conducted at Area "A" of Area of Concern 1 at Site 82 which demonstrate the results of application of the Soil Vapor Extraction System over the past few months. Also included is a color map showing the locations of the sampling (the lower right corner is point 0,0.).

One point, 3,5-1, a 0-2' depth sample, continues to exhibit levels of PCE contamination above the remedial level. It is my understanding that these results will be the subject of a conference call at 1330 hours, Monday, January 22, 1996.

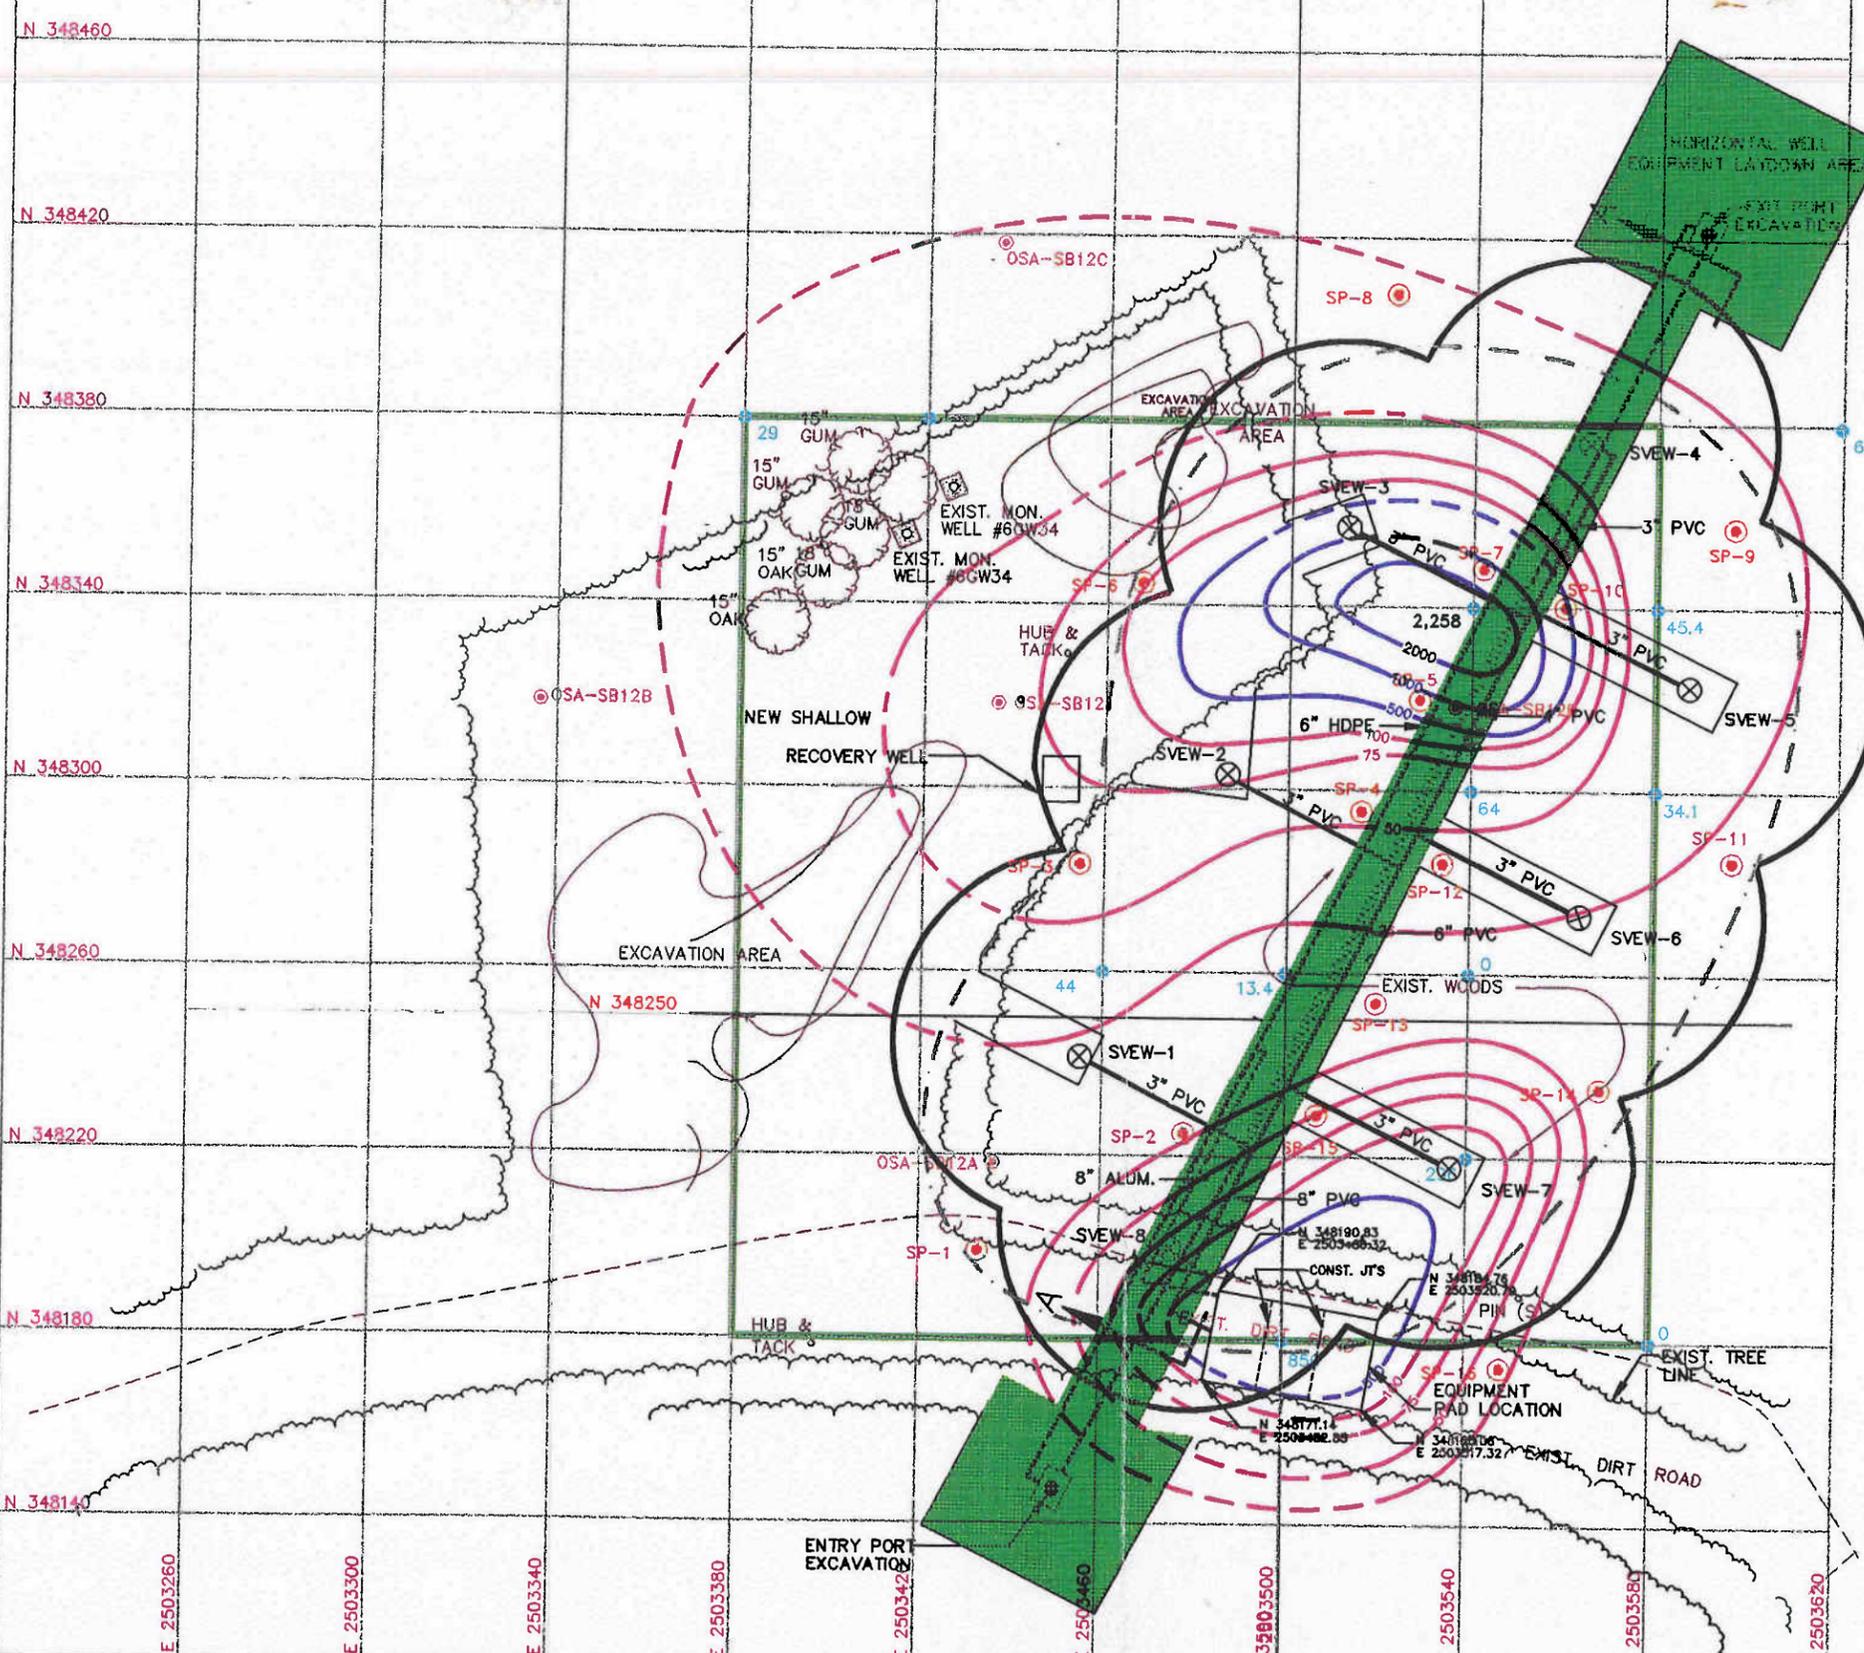

Should you require any additional information or wish to discuss these findings, please do not hesitate to contact us. I'll be at Camp Lejeune for the near future and the telephone number is 910-451-2390 or 2599.

Sincerely,

OHM Remediation Services Corp.

James A. Dunn, Jr., P.E.
Senior Project Manager

AREA "A"

LEGEND

- SAMPLE LOCATION
- VOLATILE ORGANICS CONCENTRATION MEASURED FROM LABORATORY ANALYTICAL
- 20— ISO-CONCENTRATION LINE (µg/Kg)
- 25— CONTOUR INTERVAL 25 µg/Kg
- 500— CONTOUR INTERVAL = LOGARITHMIC
- OSA-SB12 PREVIOUS BAKER ENVIRONMENTAL SAMPLING LOCATIONS
