Introduction

The purpose of this document is to address comments on the Draft Preliminary Assessment/ Site Inspection (PA/SI) Report for the Fitness Center (P-714) MILCON Area located at MCAS New River. The North Carolina Department of Environment and Natural Resources (NCDENR) Superfund Section provided the comment listed below. The response to comment is provided in bold.

NCDENR Comments (dated February 21, 2011)

Specific Comment

1. Appendix F, Table 2.2: According to the cited reference, the screening toxicity value for antimony should be 5.6 µg/l. Please correct or explain where the value came from.

The table has been revised to indicate the correct screening toxicity value for antimony as 5.6 µg/L.
