RE: Comments on the Draft RI/FS Report, UXO-19, Camp Devil Dog Construction Area  
RCRA Permit Number NC6170022580  
MCB Camp Lejeune  
Jacksonville, Onslow County, North Carolina

Dear Mr. Beck:

The NC Superfund Section has received and reviewed the Draft Remedial Investigation/Feasibility Study Report for Camp Devil Dog Construction Area (CDCA), dated November 27, 2013, for Camp Lejeune, MCB located in Jacksonville, NC. The following comments are offered for the Partnering Teams consideration. If you have any questions or comments please contact me at (919) 707-8341 or email [randy.mcelveen@ncdenr.gov](mailto:randy.mcelveen@ncdenr.gov).

### Comments

1. The comparative Summary Table of Remedial Alternatives on Page XI and Table 10-3 of Section 10, discusses Short Term Effectiveness. The Short Term Effectiveness of alternatives 2, 3, and 4 should usually be the same. However, Alternative 2 would be more effective in the short term at this UXO Site due to the dangers associated with excavation and removal of MEC in Alternatives 3 and 4.
2. Alternative 1, No Action, is not effective in the short term or the long term. Therefore, the short term effectiveness of Alternative 1 should be Not Applicable (NA) or Low.
3. David Lilley with the Division of Waste Management will be providing a review of the Risk Screening Sections of the Report. His comments will be provided at a later date.

If you have any questions or comments, please contact me, at (919) 707-8341 or email [randy.mcelveen@ncdenr.gov](mailto:randy.mcelveen@ncdenr.gov)

Sincerely,

Randy McElveen  
Environmental Engineer
