BEMD
29 JUN 1993

Mr. Rick Shiver
North Carolina Department of Environment,
Health, and Natural Resources
Division of Environmental Management
Groundwater Section
127 Cardinal Drive Extension
Wilmington, North Carolina 28405-3845

Dear Mr. Shiver:

Please find enclosed two copies of enclosures (1) through (6) for your review and approval. As discussed in the reports under "Recommendations," we will proceed with further investigation of the sites through the Atlantic Division, Naval Facilities Engineering Command, Code 1821, to include installation of additional soil borings and monitoring wells. These additional borings and monitoring wells will allow us to further delineate the vertical and horizontal extent of the contaminant plumes. This further investigation is required to develop effective Corrective Action Plans. Upon completion, reports detailing this further investigation will be forwarded to you. At that time, we will request your approval to proceed with preparation of Corrective Action Plans.

If you have questions or comments, please contact Ms. Rachel Johnson, Installation Restoration Division, Environmental Management Department, at telephone (919) 451-5872.

Sincerely,

ROBERT L. WARREN
Assistant Chief of Staff
Environmental Management
By direction of
the Commanding General
