Marti Morgan, NCDENR

PREPARED BY: CH2M HILL

DATE: January 30, 2015

Introduction

The purpose of this document is to address comments on the Draft Fiscal Year 2015 Site Management Plan (SMP) for Marine Corps Installations East - Marine Corps Base Camp Lejeune (MCIEAST-MCB CAMLEJ), North Carolina. The North Carolina Department of Environment and Natural Resources (NCDENR) provided comments on January 16, 2015 and the United States Environmental Protection Agency (USEPA) Region 4 provided comments on January 21, 2015. All comments are listed below and responses are provided in bold text.

NCDENR Comments (dated January 16, 2015)

1. Operable Unit 22, Site 96 is listed on Table 2-2 and the Site Description states Building 1817 UST. Is this Building 1817 or Building 1827? Please confirm. It has been listed in other documents at building 1827.

Building 1817 UST is the correct description for Operable Unit 22, Site 96. Building 1827 is located within the current boundary of Site 96. Additional text will be added to Table 5-2 to describe the relationship between Buildings 1827 and 1828 and Site 96.

2. Table 2-3 lists the Final ROD date as April 24, 2014. Please make appropriate changes.

The Final Site 49 ROD was signed by the Commanding General on March 3, 2014, by the NCDENR on March 20, 2014, and by the USEPA on April 24, 2014.

3. Table 2-3 does not include a RD/RA Column. Do we not keep track of our RD/RAs in the SMP? I recommend that we remove the PRAP Column and Replace it with the RD/RA Dates.

The RD/RAs are tracked in the IROD Action and the ROD Action columns of Table 2-3. These columns will be renamed to the following: IROD ACTION/RD/RA and ROD Action/RD/RA.

-
4. Table 2-4 lists Site UXO-29 as proposing a PA/SI for the follow-up work. The UXO-29 MILCON identified high explosives (HE) and other MEC & MPPEH throughout the Area. We should probably complete the investigation of this Site as an RI since LUCs will be required. Check page 3-6 Section 3.1.3.1; Future Activities.

Since the investigation approach and path forward will need to be discussed by the Partnering Team, the text has been updated to reflect that additional investigation will be conducted within the MMRP site.

5. Please change NC Route 24 to 17 Bypass in Section 4.1.1 on page 4-1.

The text in Section 4.1.1 will be updated to from North Carolina Route 24 to US 17 Bypass.

6. Schedule 4-1 has not been realized. This may be true of a number of work schedules for the FY2015 SMP. Please update all schedules as needed in the Final SMP.

Schedule 4-1 will be updated to reflect the current status of Site 37 and all other schedules will also be reviewed and updated as necessary.

USEPA Comments (dated January 21, 2015)

7. Change “Proposed Remedial Action Plan” to “Proposed Plan” through-out the document.

The text in Section 2.3.5 and throughout the document will be updated to Proposed Plan except where specific report titles in the Administrative Record are “Proposed Remedial Action Plan”.

8. Schedule 6-1, IRP Site 88: Correct schedule. ROD was signed October 29, 2014.

Schedule 6-1 will be updated to reflect the correct dates for deliverables.

9. Table 8-30, Land Use Control Summary, IRP Site 49: Correct dates: Final ROD – April 2014, Onslow County Registration Date – September 2014.

Table 8-30 will be updated to reflect the correct ROD and Onslow County Registration dates.
