Good Morning,
Attached is EPA's comment on the Five-Review Fact Sheet as a pdf comment summary. The Fact Sheet looks great and it simplifies a large document into a few easy to read paragraphs.

ENVIRONMENTAL CLEANUP AT MARINE CORPS BASE CAMP LEJEUNE

2015 Five-Year Review Fact Sheet

November 2015

This fact sheet summarizes the results of the 2015 Five-Year Review at Marine Corps Base Camp Lejeune (MCB Camp Lejeune). Five-Year Reviews are conducted to ensure current environmental cleanup activities are effectively protecting public health and the environment. *The 2015 Five-Year Review indicated all ongoing remedial actions at MCB Camp Lejeune are protecting human health and the environment.* The review also provided recommendations to ensure some remedies will continue to be protective in the long-term.

FIVE-YEAR REVIEW

²The Department of Defense (DoD), working in partnership with the Navy, MCB Camp Lejeune, United States Environmental Protection Agency (USEPA), and North Carolina Department of Environmental Quality (NCDEQ) has completed a Five-Year Review of ongoing environmental cleanup actions at MCB Camp Lejeune. The purpose of the Five-Year Review is to ensure that the cleanup actions are continuing to protect human health and the environment. A site is included in the Five-Year Review if contaminants remain above levels that would allow for unlimited use and unrestricted exposure and if there is a *Record of Decision (ROD)* in place. Seventeen “operable units” or OUs, covering 26 sites, were evaluated in this Five-Year Review.

Words shown in italics are defined in text boxes.

The Record of Decision (ROD) documents the selected remedy following consideration of public comments. It reflects an evaluation of the potential human health or environmental risks posed by the site.

BACKGROUND

MCB Camp Lejeune is a military installation in Onslow County, North Carolina. The Base’s mission is to maintain combat-ready units for deployment and humanitarian missions abroad. Historical operations, storage, and disposal practices at MCB Camp Lejeune resulted in environmental impacts to soil and groundwater. The DoD is responsible for identifying, assessing, and cleaning up these environmental impacts. The investigation and cleanup is being conducted under the Navy’s Installation Restoration Program (IRP) and under provisions of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), commonly referred to as “Superfund.”

Who is the Department of Defense? They are working in partnership with the Navy, MCB Camp Lejeune, etc. This statement appears as if they (DoD) are a single entity. Suggest this sentence be restructured and/or corrected.
