Introduction

The purpose of this document is to address comments on the Final Remedial Design for Site UXO-19, Operable Unit (OU) 25. The United States Environmental Protection Agency (USEPA) provided the comments listed below. The North Carolina Department of Environmental Quality had no comments on the document. The responses to comments are provided in bolded text.

USEPA Region 4

Comments (received via e-mail on March 21, 2016)

1. Section 3.2.7 Monitoring Land Use Controls. The 3rd sentence of the first paragraph (page 3-5), the text refers to notifying the regulators within 10 days (after discovery of a LUC breach.) However, the next-to-last sentence on page 3-5 states that the regulators will be notified no longer than 30 days after discovery. Please modify “30 days” to “10 days” to be consistent with the EPA LUC Checklist.

The suggested changes have been made.

2. Section 3.2.8 Enforcement. Page 3-6, first paragraph, first sentence. The text states that the Navy and/or MCB Camp Lejeune will begin the process of addressing the LUC breach no later than 30 days after the Navy becomes aware of the breach. Please modify to “30 days” to “10 days” to be consistent with the EPA LUC Checklist.

The suggested changes have been made.
