Subject: RE: OU1 NFA Draft Final PRAP - clean copy with RTC

I have reviewed the subject documents and have the following comment.

RESPONSE: The text was revised to state that "No state groundwater quality  
standards exist for PCBs; therefore, any detection at or above the laboratory  
practical  
quantitation limit would be an exceedance of this standard."

While I agree with the response I wish to make the following change to the  
wording. Delete "laboratory" and put "(PQL)" after "Practical Quantitation  
Limit". In addition, add the definition of Practical Quantitation Limit as  
defined in the 15A NCAC 02L .0102 DEFINITIONS to the Glossary.

All,

Attached is the OU1 NFA Draft Final PRAP for your review and comment. This one is the "clean" copy. I will be sending the "track changes" version after this one. I also attached the Response to Comments document. Please let me know if you are able to receive this. The file is rather large (5+ MB). Also, please let me know if you have any questions or comments. You will note that the public comment period starts April 6, 2010, so it would be best to have then done by April 1.

Thanks for your effort,

Erica L.S. DeLattre, PE
