Mr. Lance S. Laughmiller  
Atlantic Division, Code 18235  
Naval Facilities Engineering Command  
1510 Gilbert St.  
Norfolk, VA 23511-2699

Reference: CLEAN Contract No. N62472-90-D-1298  
Contract Task Order (CTO) No. 265

Subject: Marine Corps Air Station, Cherry Point, North Carolina  
Site 16 - Sandy Branch Landfill  
Transmittal of the Treatability Study Work Plan

Dear Mr. Laughmiller:

Enclosed please find two copies of the work plan for the air sparging/soil vapor extraction treatability study at Site 16 - Sandy Branch Landfill. Informational copies have also been forwarded to Gena Townsend of the U.S. Environmental Protection Agency and Linda Raynor of the State of North Carolina.

In an effort to reduce costs to the Navy, the field effort associated with installation of the treatability study will be performed during the same time period as the field effort associated with the pump test at the Building 137 - Paint Stripper Barn (CTO 266). By conducting concurrent field efforts, a single subcontractor can be procured to perform the field work at both sites thus saving costs associated with procurement, mobilization, and demobilization. It is expected that drilling, surveying, and IDW Management subcontractors can be procured as such. Therefore, to ensure coordination of the field events, it is requested that any comments be provided by August 1, 1996. Field activities are anticipated to commence on or around August 5, 1996.

An existing Health and Safety Plan for MCAS Cherry Point will be addended to include site specific information and tasks associated with installation and operation of the treatability study system.

Mr. Lance S. Laughmiller  
Naval Facilities Engineering Command  
July 2, 1996 - Page 2

If you have any questions or concerns, please feel free to contact me at 412-921-8861 or the Project Engineer, Bob DeLisio, at 412-921-7271.

Sincerely,

Steven H. Ruffing, P.E.  
Project Manager

Approved for Submission

John J. Trepanowski, P.E.
