RE: Class 1 Modifications
Naval Surface Warfare Center
Crane, Indiana
IN5 170 023 498

Dear Captain Howard:

The United States Environmental Protection Agency hereby approves your request, dated October 15, 1992, to revise the Facility's Part A and cover of the Resource Conservation and Recovery Act (RCRA) container storage operating permit. The two changes made to the Part A are as follows:

1. The name of the Facility has changed from Naval Weapons Support Center (NWSC), as listed in the original permit, to Crane Division, Naval Surface Warfare Center. The appropriate acronym for purposes of the RCRA permit and associated correspondence is NSWC Crane or NAVSURFWARCENDIV. The name change is due to reorganization by the Department of the Navy.
2. NSWC Crane has identified an operation that according to 40 CFR 261.31, generates an F019 waste. The sludges from this operation have been disposed and manifested as F006 in the past. This is essentially a documentation change as it does not affect handling or disposal methods of the sludge.

A replacement cover page to your RCRA permit, identifying the Facility's new name, is enclosed. The Part A change will be added to the record, and does not change any conditions in the Federal portion of the RCRA permit. If you have any questions regarding this matter, please contact Ms. Carol Witt-Smith of my staff, at (312) 886-6146, for assistance.

Sincerely,

Karl E. Bremer
Karl E. Bremer, Chief
RCRA Permitting Branch

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION V

Name of Permittee: Owner: United States Department of Navy
Operator: United States Department of Navy

Facility Location: Street Address: (None)
City, State: Crane, Indiana

EPA Identification Number: IN5 170 023 498

Issuance Date: _____

Authorized Activities:

Pursuant to the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (RCRA) of 1976, and the Hazardous and Solid Waste Amendments (HSWA) of 1984, (42 U.S.C. §6901, *et seq.*), and regulations promulgated thereunder by the United States Environmental Protection Agency (U.S. EPA) (codified in Title 40 of the Code of Federal Regulations (CFR)), Federal permit conditions (hereinafter called the permit) of the RCRA permit are issued to United States Department of Navy (USN) (hereinafter called the Permittee), for the facility Crane Division, Naval Surface Warfare Center (NSWC Crane) located at Crane, Indiana.

The RCRA permit contains both the effective Federal permit conditions (contained herein) and the effective State permit conditions issued by the State of Indiana's RCRA program authorized under 40 CFR Part 271 (hereinafter called the State permit). When both this permit and the State permit are effective, the Permittee has an effective RCRA permit which authorizes the Permittee to conduct hazardous waste management activities as specified in the RCRA permit.

Permit Approval:

On January 31, 1986, the State of Indiana received final authorization pursuant to Section 3006 of RCRA, 42 U.S.C. §6926, and 40 CFR Part 271, to administer the pre-HSWA RCRA hazardous waste program. Since the State of Indiana has not yet received authorization to administer the entire hazardous waste program requirements of HSWA, additional permit conditions must be issued by the U.S. EPA to address these new requirements. These additional conditions are contained in this permit.

The Permittee must comply with all terms and conditions of this permit. This permit consists of the conditions contained herein (including those in any attachments) and the applicable regulations contained in 40 CFR Parts 260, 261, 262, 264, 266, 268, 270, and 124, and applicable provisions of HSWA.
