Re: Class 2 Subpart X Permit Modification
Addition of Aluminum to Groundwater
Monitoring Plans at Demolition Range

Dear Mr. Brent:

The United States Environmental Protection Agency (U.S. EPA) has received your request for a Class 2 modification of the Final Open Burning/Open Detonation (OB/OD) Hazardous Waste Management Permit dated January 13, 2000. This permit modification requested to add aluminum to the list of constituents undergoing detection monitoring at the Demolition Range. We have also received all supporting information as required under 40 Code of Federal Regulations 270.42(b). A public hearing was held at the Bedford Public Library in Bedford, Indiana on December 2, 2000. No public comments were received regarding this modification.

The U.S. EPA hereby approves the permit modification. Please replace the appropriate pages in the OB/OD permit with the revision pages to the Field Sampling Plan, Groundwater Monitoring Plan, and Quality Assurance Project Plan sent as attachments to your letter of October 10, 2000.

If you have any questions in this matter, please contact me.

Sincerely,

Peter Ramanauskas
Environmental Engineer
Waste Management Branch
