Pete:

Bill, Roger, & I had a conference call this a.m. to discuss your comments on the proposed additional soil samples for the ORR. In general, the responses were as follows:

Comment 1) We agreed that the number of samples was confusing. Hopefully, you will find the revised documents clear up this issue.

Comment 2) As the documents explain, the samples are located where the ditch changes directions or where smaller ditches drain into the larger channel. Specifically, areas of potential sediment deposition, prior to exiting SWMU, and prior to entering Turkey Creek. Should the sampling results lead to the need for removal (e.g., composting), then certainly additional samples would have to be taken in order to define the limits of the contamination. Additionally, if your adamant about it, a 7<sup>th</sup> point is left to the discretion of the field crew, and could be located there.

Comment 3) Correct.

Attached are the revised pages for the plan. A hard copy will follow sometime the first week of January 2002.

Merry Christmas & Happy New Year,  
Tom

Contract Task Order 160

**Subject: Additional Soil Sampling- Old Rifle Range**

Dear Mr. Gates:

In response to our teleconference this morning, attached please find one (1) copy of the revised proposed soil-sampling plan for ditch samples at the Old Rifle Range at the NSWC Crane. The figure illustrating the sampling locations has not been modified and therefore is not being resubmitted. As per your instructions, I also forwarded (email) this document to Tom Brent for distribution to the regulators. Please contact me if you have questions or concerns regarding this correspondence.

I will contact you later this week to confirm receipt of this correspondence and to answer any questions you have. As always, you can reach me at (412) 921-8415 or 1-800-245-2730 if you have any questions regarding this correspondence.

Very truly yours,

Roger A. Clark, Ph.D.  
Task Order Manager

This e-mail submitted replacement pages for the submittal of the Sampling Plan for Additional Soils sampling at Old Rifle Range. The pages have been incorporated into the previously submitted Report dated 12/13/01 (Ser 095/1418).

Pages replaced:

1. Verification Sampling at the Old Rifle Range (ORR)
2. Table 1
3. Table 2
4. Table 3
