Subject: Additional MFA IMR Addendum Comment + RKI IMR Comments

Chris,

In addition to my previous email comment, the only other thing we'd like to see for the MFA IMR Addendum is the MS/MSD data actually achieved for the PES and Windrow samples (for explosives compounds only).

Also, for the RKI IMR Report I have only the following comments:

- 1) Section 3.1.1: states that grid 7 was not sampled because of gravel. Figure C-1 states that this grid was below residential cleanup goals. How can this statement be made if the grid was not sampled? Was the gravel sampled?
- 2) For the ICS noted in tables E-2, E-3, and E-4, provide explanation for why many constituents are no longer tested (NT notation) for after a certain time (around February 2000).

Let me know if you have any questions.

Thanks!
Pete
