Subject: Final Basewide Pennsylvanian Bedrock
Background Groundwater Evaluation Report
Naval Support Activity Crane
Crane, Indiana

Dear Mr. Hickey:

Please find enclosed a hard copy and an electronic copy of the Final Basewide Pennsylvanian Bedrock Background Groundwater Evaluation Report for Naval Support Activity (NSA) Crane. Mr. Tom Brent at NSA Crane has been sent four copies for his files and distribution to Indiana Department of Environmental Management and (IDEM) and USEPA.

This evaluation was performed to develop a dataset of metals concentrations from existing wells at NSA Crane that represents background conditions in groundwater from the Pennsylvanian bedrock. This background dataset is intended to be used in RCRA corrective actions at NSA Crane to identify site-specific metals concentration that are within the range of background conditions and therefore would be eliminated from further consideration in the RCRA corrective action process, in accordance with Navy policy for use of background data.

If you have any questions, please contact me at 412-921-7281 or tim.evans@tetrattech.com.

Sincerely,

Timothy S. Evans
Project Manager
