Re: SWMU 27/Bldg 181 No Further Action Request
NSWC Crane
Crane, Indiana
IN 5170023498

Dear Ms. Freeman:

The Indiana Department of Environmental Management has reviewed the RFI Report (VFC#66795774) and the Interim Measures Report for Solid Waste Management Unit 27 – Pyrotechnic Production Area and Building 181 (VFC#69825499). IDEM agrees that with the removal of the tanks and sumps these two areas do not present a risk to human health or the environment and no further action is required.

The No Further Action determination is not final until the facility's operating permit has been modified. Crane may submit a Class 1 permit modification request outlining the proposed changes to the language in the permit conditions and in the SWMU summary in Attachment VIII. The Class 1 modification request should briefly outline the reason for the change and reference the RFI Report for details.

If you have any questions regarding this matter, please call Doug Griffin of my office at 317/233-2710 or by email at dgriffin@idem.in.gov.

Sincerely,

Victor P. Windle, Chief
Hazardous Waste Permit Section
Permits Branch
Office of Land Quality
