Subject: SWMUJ 3 Soil Tech Memo

Hi Tom,

Hope the rest of your vacation in Florida was a good one!

I read through the May 6, 2015 Technical Memorandum Addendum Report - SWMU 3 Soil and had a few comments:

- 1) On page 4, Southern Study Area Boring 03SB48: The last sentence of the paragraph states that lead contamination is contained within the upper two feet of soil, which doesn't appear accurate.

- 2) Referring to Figure 3-2, were certain locations not able to be vertically bounded due to refusal (e.g. 03SB147, 03SB185)?

- 3) The second to last sentence of the first paragraph of Section 3.5 states that no step-out or step-down samples were warranted in this area, but it seems that intervals deeper than 6 feet were analyzed in 2014.

Thanks,

Pete
