Subject: Final Interim Measures Work Plan (IMWP) for Solid Waste Management Unit (SWMU) 17
- PCB Capacitor Burial/Pole Yard - Page Revisions for Revision 1

Dear Mr. Hickey:

Enclosed are revision pages and three-ring binder spine labels for the final IMWP for SWMU 17, NSA Crane, Crane, Indiana, which was issued in October 2012. These pages, provided in Attachment A, were prepared in response to USEPA 5 comments dated November 29, 2012. Changes were made throughout Section 3, to Table 2-1, and to four figures in Section 2 and two figures in Section 3. The cover, title page, spine label, and table of contents were also updated to reflect these changes. The nature of these changes is as follows:

- Table 2-1 was updated to incorporate all total PCB results for soil, sediment, surface water, and groundwater collected at SMWU 17 to date.
- Figure 2-3 was updated to attached leader lines to sampling locations that did not have attached lines.
- In Figures 2-14 and 2-15, the label for Excavation Area 4A-10 was changed, the depth intervals for locations 17SB172 and 17SB175 were updated, and the location where confirmation sampling will be required in Area 4A-10 was identified.
- Figure 2-17 was updated to indicate where confirmation sampling will be required for Area 4C.
- Figure 3-5 was updated to indicate where confirmation sampling will be required for Area 4C.
- Figure 3-6 was updated to indicate where confirmation sampling will be required for Area 4A-10.

Instructions are provided at the front of Attachment A that describe how to replace the old pages and spines in the final IMWP with the enclosed pages.

An MS Word Track Change version of the Section 3 text is included as Attachment B. This version of Section 3, which is not to be used as replacement pages, shows where changes were made to Section 3 text. One complete copy of these materials and the entire IMWP with changes incorporated is provided on the accompanying compact disk (CD).
