Subject: **Revised Draft**
SWMU 16 Soil Delineation Sampling Data Summary Report, Naval Support Activity
Crane, Crane, Indiana

Dear Mr. Hickey:

The enclosed Report contains the results of Delineation Sampling for SWMU 16. The draft Report had been submitted to the Navy on March 16, 2012. The draft Report contained the results of the first round of delineation sampling and recommendations for a second round of sampling to complete the delineation process. EPA comments were received on May 20, 2012. These comments did not require any modifications to the draft Report including the proposed second round of sample collection. The second round of delineation sampling has been completed. All contamination has been bounded to the extent necessary to prepare the Interim Measures Work Plan (IMWP).

An electronic (pdf) version and Word (text only) version of the report has been posted to the Tetra Tech RMFT site. Access information will be sent via e-mail.

Please contact the undersigned at (412) 921-8308 (email: Ralph.Basinski@tetrattech.com) or John Ducar at (412) 921-8089 (email: John.Ducar@tetrattech.com) regarding any questions or comments.

Very truly yours,

Ralph R. Basinski
Project Manager
