Thanks, Doug, for the quick response! We'll go ahead and finalize the IMR and the RFI for SWMU23...and we'll not be sending a SoB your way. Again, thanks!

V/r,

Linda

According to my notes the updated RFI updated the risk assessment so I had no other concerns. Include this site with the permit mod that updates the swmu status'.

Since there has been so little public interest in Crane (none) I would prefer to save SoB for situations where we're leaving a lot of waste/contamination in place. Sites where we're leaving waste with a cap to be maintained for example. SWMU 23 doesn't qualify.

Subject: NSA Crane: SWMU23 IMR and RFI - NFA

Good morning, Doug! Hope you had a nice weekend. It's not too bad here in Williamsburg but as you can see from the date/time of this email, I'm actually working today (which really, really goes against my natural inclinations - I missed a bird club walk this morning - URGH!). I'm working because I'm updating our data for our budget to Congress. For SWMU23 I'm inclined to say that we don't need any more \$\$\$...inclined but not yet committed.

We submitted a response to your comments (RTC) on the draft final IMR on 2/25/2016. I'm optimistic that we addressed your concerns but I do need you to concur.

Also for the draft final RFI, we sent the RTC on 1/13/2016 but have not yet received notice that you find our responses acceptable. Of course, you could have accepted both of those RTC submittals and I just forgot to save the email!!!

If you find NFA acceptable for this site, I'd like to confirm that neither a CMS (not funded) nor a SoB (funded but we could use the money for another project) is required...we'll just update the SWMU descriptions in the permit to reflect NFA.

So what do you think? Should I ask Congress for more money or not?

V/r,

Linda
