

MINUTES
TECHNICAL REVIEW COMMITTEE MEETING
NAVAL WEAPONS STATION EARLE
COLTS NECK, HUDSON COUNTY, NEW JERSEY
13 February 1990

Meeting started at 10:00 am.

List of attendees is attached.

The main agenda was the agency response to the Site Investigation Work Plan. NJDEP will have written responses to the Navy by next week for SI and RI work plans.

EPA's comments for the SI work plan are essentially the same as those submitted at the last TRC meeting for the RI work plan. It was generally discussed and agreed that the Health and Safety Plan and Quality Assurance Plan (not yet submitted) for the SI could be the same as those used for the RI except where particular site conditions need to be addressed.

Several other comments on SI: Figure 1 (plate) was missing from the submittal. Also tables 4-1, 4-2 are listed in Table of Contents but are not in the text.

Concern about clarity of graphics in the SI Work Plan:

- o All maps should be scaled.
- o Include key landmarks relevant to sampling locations.
- o Make use of aerial photographs to identify site boundaries and features.

P. Ingrisano, (EPA) questioned the exclusion of five areas, previously identified by NJDEP, from the SI Work Plan.

J. Mahoney, (Navy) stated that these sites are currently active and are covered under different programs. NJDEP asked if the SI and RI work could be done concurrently and if funding would be a problem. Ms. Townsel stated that the Navy planned to proceed this way there would be no impact on funding.

WESTON

It was agreed that sampling locations would be staked in the field prior to the start of work by the Navy's consultant. NJDEP would plan to be present.

NJDEP - Re: permitted closure of Sites 18 and 28. The agencies will need to review the RCRA closure plans in reference to CERCLA.

EPA - General comment on SI: make sure analytes are consistent with site history, e.g. Site 1 used fuel oil to burn. Should analyze soils for TPH. TRC agreed to do this.

Validation: agreed that data validation for SI and RI will be 100 percent, and performed by subcontractor.

Community Relations: P. Mulldrow stated that approximately ten interviews were complete and more needed to be done. She can handle this effort without additional help from Northern Division.

Finalizing the RI and SI Work Plans: to save time WESTON for the Navy will prepare a written response to agency comments to be submitted in the form of a letter followed by a telephone conference as necessary. No schedule was set but turnaround would be ASAP. If practical, the letter will stand as an addendum to the report for final approval.

Meeting adjourned at 10:45 am.

Next meeting of the TRC is April 10 at 10:00 am.

Feb 13 TRC meeting

Name AMELIA JACKSON

Title QA Chemist

Address EPA-Reg. 2
Woodbridge Ave
Edison NJ 08837

Telephone Number 201-906-6164

Name DENNIS SWANWELL

Title ENVIRONMENTAL TECHNICIAN

Address NWS EARLE

Telephone Number (201) 577-2146

Name William Pinamont

Title ATTORNEY LT, JAGC, USN

Address Naval Weapons Station Earle
Cotts Neck NJ

Telephone Number 577-2117

Name PAUL G. INGRISANO

Title USEPA - RPM

Address 26 FEDERAL PLAZA
NEW YORK, NY 10278

Telephone Number 212-264-6609

Name RICHARD C. JOHNSON

Title Proj Manager

Address Roy Fweston
