Subj: DATE CONFIRMATION FOR PCB SPILL AT SITE #29

1. Please be advised that there are conflicting dates relative to the PCB spill at Site #29.
2. The Initial Assessment Study, prepared by Fred C. Hart Associates, Inc., Sept. 1982, indicates that the spill took place in 1977. The soil analysis from Environmental Science Corporation of Middletown, Conn. is dated June 24, 1981, four years after the 1977 time frame.
3. After further investigation it has been determined that the Hart Report is incorrect and the spill actually took place in June 1981.
4. Should there be any questions, do not hesitate to call Mr. Gus Hermanni, who can be reached at (908) 577-2339 or AV 449-2339.
