Dear Mr. Kolicius:

Re: Engineering Evaluation & Cost Analysis (EE/CA) and  
Work Plan for Sites 22, 23 and 27  
Colts Neck Twp., Monmouth Co.

The New Jersey Department of Environmental Protection (NJDEP) has reviewed the above referenced documents prepared by Foster Wheeler Environmental Corporation., dated August 1996. The NJDEP approves this report pending incorporation of the following comments.

Engineering Evaluation & Cost Analysis:

1. Page 4, Section B 2: Please updated this section since the USEPA and the NJDEP have already commented on the Revised RI Report.
2. Page 7, Section 6 : The report should mention that if the site is being cleaned up to the NJDEP Non-Residential Cleanup Criteria, a Declaration of Environmental Restrictions (DER) will have to be implemented.

Work Plan:

1. Section 3.3.4, Section 3.4.3, Section 3.5.4 and Table 4.1: Compositing samples for post-excavation analysis is not allowed. the samples for post excavation samples must be discreet. See Section 6.4 of the Technical Requirements for Site Remediation (See attached).
2. Section 6.1: The report states that, "No reports to regulatory agencies shall be submitted by Foster Wheeler Environmental relating

to the remediation activities at Sites 22, 23, and 27." Does this mean that Foster Wheeler does not plan on submitting a Remedial Action Report after the remedial work is complete on these sites? Please Explain.

3. All proposed post- excavation sample locations should be depicted on a site map.

If you have any questions, please call me at (609)-633-7237.

Sincerely,

Bob Marcolina, Case Manager  
Bureau of Federal Case Management
