Appl.: 98-0002
Proj.: EARLE NAVAL WEAPONS STATION AREA 4 & 5
Twp.: COLTS NECK
Block: N/A
Lots: N/A

Dear Mr Dunn:

We have conducted our review of the revisions submitted for the above-referenced application and find them to be incomplete. The following deficiencies must be addressed in order for the application to be complete.

1. Submit design support calculations for site 5, the two (2) proposed 18" CPPs.
2. Provide design support calculations, cross section and profile for the proposed waterway below rip rap rock apron 4-2 on site 4.
3. Design support calculations and cross section and profile are necessary for the grading below proposed detention pond 2 at site 5, the final outfall of the 12" CPP beyond the rock apron DB2.
4. At final outfalls and site 4 (4-1) and site 5 (5-2) respectively, design support calculations documenting stability beyond the discharge point are required.

Please incorporate the above items in a revised plan and forward three (3) copies, along with supporting calculations, if required, to our office for further review. Upon review and determination that the items have been correctly and completely addressed, the application will be considered complete and recommended for approval or final disposition. If you have any questions, please contact us.
