Attention: Brian Helland

Reference: CLEAN Contract No. N62472-90-D-1298
Contract Task Order (CTO) 0031

Subject: Closure Plan Implementation Summary
Underground Storage Tank (UST) Investigation at Building C-17
NWS Earle
Colts Neck, New Jersey

Dear Mr. Helland:

As per CTO 0031, please find attached one copy of the completed Site Assessment Summary Form. Please note that the summary form must be signed by the individual(s) performing the tank decommissioning portion of the closure plan and the highest ranking individual responsible for the facility. In order to maintain the deliverable schedule, the signed summary form must be returned to me by May 8, 1992. As requested in the statement of work, three copies of the completed Site Assessment Summary Form have been transmitted to the commanding officer at NWS Earle under separate cover.

In order to meet New Jersey Department of Environmental Protection and Energy (NJ DEPE) Bureau of Underground Storage Tank (BUST) requirements for the Closure Plan Implementation Summary, the Final Site Characterization Report for the UST Investigation at Building C-17, NWS Earle, will be appended to the completed Site Assessment Summary Form. The Draft Site Characterization Report was transmitted to you for your review on April 20, 1992. In order to maintain the deliverable schedule, all review comments must be returned to me by May 8, 1992. Upon my receipt of the review comments for the draft report, the comments (where appropriate) will be incorporated and a Final Site Characterization Report will be issued and appended to the completed Site Assessment Summary Form.

Please contact me at the above number with any questions or comments.

Respectfully,

Jill Hartnell
Project Manager
