re: Final Site Investigation Report for the Fort Story Preliminary
Assessment/Site Investigation, Jan. 1992; Workplan for Biological
Remediation, LARC Maintenance Area, Feb. & May 1992; and Shallow
Aquifer Analysis for the Bioremediation Area, May 1993.
Facility/Location: LARC Maintenance Area (Wash Rack), Site #6, Fort
Story, Virginia Beach, Virginia
DEQ Tracking Number: 92-1047

Dear Sir:

Thank you for providing the Department of Environmental Quality with the
above referenced reports for this site. It is our understanding that
biological remediation activities at the Wash Rack area are complete.
According to the information in our files, there appears to be very little
risk of petroleum contamination reaching sensitive receptors. However, we
need to review the results of the bioremediation activities before deciding if
further assessments or remediation are required. Please submit the results of
the bioremediation project, and any other information that may be helpful to
our review, by November 18, 1994.

If you have questions regarding this request, please contact me at (804)
552-1157.

Sincerely,

Amy T. Webster
Geologist Senior
