**RE: Final Remedial Investigation Report  
80<sup>th</sup> Division Reserve Site  
Fort Story, Virginia**

Dear Ms. Bateman:

The Virginia Department of Environmental Quality (DEQ) has received the *Final Remedial Investigation Report* (RI Report) for the 80<sup>th</sup> Division Reserve Site located at Fort Story, Virginia. The RI Report, prepared by Malcolm Pirnie, Inc., was received by the DEQ on November 3, 2008.

Thank you for providing the DEQ's Office of Remediation Programs the opportunity to review the above-referenced RI Report. Subsequent to DEQ's internal review, this office concurs with the recommendation to prepare a Decision Document (DD), which is to include a public comment period that facilitates public involvement in the CERCLA cleanup process. The information contained in the RI Report provides sufficient information to support an informed risk management decision that because no potential current or future risk was identified, preparation of a feasibility study (FS) at this Non-National Priorities List (Non-NPL) site is not warranted.

This letter is intended only as guidance and is not intended to be a case decision under the Virginia Administrative Process Act. If you would like to discuss this guidance, please contact me at (804) 698-4125 or [wmsmith@deq.virginia.gov](mailto:wmsmith@deq.virginia.gov).

Sincerely,

A handwritten signature in black ink, appearing to read "Wade M. Smith". The signature is stylized and cursive.

Wade M. Smith  
Remediation Project Manager  
Office of Remediation Programs
