re: Final Report, 80th Division Removal Action, Fort Story, August 1995
Facility/Location: LARC 60 Area, Fort Story
DEQ Tracking Number: PC 94-2275

Dear Sir:

Thank you for providing the Department of Environmental Quality (DEQ) with the above-referenced report. Based upon the information you have provided regarding current site conditions, the DEQ-Remediation Program still believes that petroleum hydrocarbon contamination levels at this site do not warrant further corrective action. Should future environmental problems occur, which the DEQ determines are related to this release, additional investigation and corrective action may be required in accordance with State Law.

You should refer all questions concerning the release of solvents and other non-petroleum contaminants at this site to Mr. Durwood Willis with our Office of Federal Facilities.

If you have any questions, please contact me at (804) 552-1157.

Sincerely,

Amy T. Webster
Geologist Senior
Ground Water Section
