Re: Initial Abatement Measures/Site Check Report and Site Characterization Report
in Response to a Petroleum Hydrocarbon Release from Wash Rack Activities
Site Name/Location: Wash Rack at the LARC 60 Area, Fort Story, Virginia Beach
DEQ Tracking Number: PC 94-2275

Dear Sir:

Thank you for providing the Department of Environmental Quality (DEQ) with the information concerning the subsurface investigation at your facility. Based on this information and reported site conditions, no further assessment or remedial action is necessary at this site in response to the petroleum hydrocarbon release. However, should additional evidence of environmental contamination be discovered in the future, further assessment and remediation may be required.

Please note that any excavated soils should be disposed of in accordance with Waste Division regulations and guidelines.

If you have any questions regarding this matter, please contact Amy Webster at 804/552-1157 or me at 804/552-1156.

Sincerely,

LeAnn Moran
Geologist, Ground Water Section
