LARC 60 Update TS Test #1
Memo.doc (34 KB...roundwater Results.

I remember discussing the attached results with you over the phone but I don't have an e-mail record of where I sent them to you. Please take a look at the memo and results from the LARC 60 Groundwater Treatability Study. Do you concur with using a higher concentration of permanganate?

Joanna,

I have attached a project update memo for the LARC 60 site that includes 2 main issues: (1) Round 2 of the treatability test and (2) approval of the WP addendum for the two additional wells. Have also attached the groundwater results associated with round 1 of the treatability test. Please review the memo and get back to me. Thanks.

<<LARC 60 Update Memo.doc>> <<TS Test #1 Groundwater Results.xls>>

Also, any update on the Oil/Sludge RA schedule?
