Subject: Draft Final Remedial Investigation/Risk Assessment Report  
Site 12 – Harbor Dredge Spoil Area  
Naval Station Great Lakes  
Great Lakes, Illinois

Dear Mrs. Van Donsel:

Please find enclosed two electronic copies on compact disc (CD) of the subject report for your review and comment. Copies have also been distributed to the other members of the project team as indicated below. This draft final version of the Remedial Investigation/Risk Assessment Report for Site 12 includes the results of the Phase 2 and Phase 3 field efforts, conducted in December 2012 and August 2013, respectively, to address potential pollutant mobility concerns raised by the Illinois EPA. The field efforts involved collection and analysis of additional soil and groundwater samples from Site 12. The Navy and Illinois EPA previously agreed on the scope of the sampling programs during preparation of separate sampling and analysis plans.

The following electronic files are included on each CD:

- Transmittal Letter
- RI Report with tracked text changes (track-change format)
- RI Report with all changes incorporated (final format)

It is requested that your technical review be completed and comments provided by January 31, 2014. After all technical review comments are resolved, a final version of the report will be prepared and hard copies and electronic copies will be distributed to the team for their records. If you have any questions regarding the report, please contact me at 412-921-8984.

Sincerely,

A handwritten signature in black ink, appearing to read 'Corey A. Rich'.

Corey A. Rich, P.E.  
Project Manager
