**Subject:** RE: Site 12 Phase 3 SAP - RTC Document for Illinois EPA Comments and Track Change Revision

Corey and Terese,

Illinois EPA has received the responses to comments on the Phase 3 Site 12 SAP along with the revised version of the SAP in track change mode. A review of the responses and associated changes to the document confirms that the plan is acceptable for its intended use. The Agency has no further comments.

The Navy can finalize the document and conduct the specified field work as time allows. Please provide the agency as much notice as possible prior to this field work in order that we might be able to be on-site to observe the installation of the wells and collection of the groundwater samples.

If you need anything else from me, please let me know.

Respectfully,

Brian A. Conrath  
Illinois EPA

**Subject:** FW: Site 12 Phase 3 SAP - RTC Document for Illinois EPA Comments and Track Change Revision

Brian,

Attached for your review and concurrence are the RTC document for Illinois EPA's July 3, 2013 comments on the Site 12 SAP and a track change version of the SAP. All changes to the SAP have been made in accordance with the RTC document. Please provide your concurrence or additional input at your earliest convenience. The field work for this project is tentatively scheduled for the week of August 12, 2013. Hopefully, we can get the SAP finalized within the next week or two.

Thanks,
