Subject: Draft Final Sampling and Analysis Plan Addendum (UFP-SAP/QAPP)  
Phase 3 Remedial Investigations for Site 12 – Harbor Dredge Spoil Area  
Naval Station Great Lakes  
Great Lakes, Illinois

Dear Mrs. Van Donsel:

Please find enclosed two hard copies and two electronic copies on compact disc (CD) of the subject sampling and analysis plan for review and comment. Copies have also been distributed as indicated below. The plan addresses the installation of groundwater monitoring wells and groundwater sampling that the Navy will conduct at Site 12 to address the soil-to-groundwater migration issue. The Navy and Illinois EPA previously discussed and agreed to the scope of the additional sampling program. It is requested that the review be expedited so the field work associated with the plan can be conducted in August 2013.

After review comments are incorporated and concurrence from Illinois EPA is provided on the plan, a final version of the plan will be prepared and hard copies and electronic copies will be distributed to the team for their records. I will route separately by electronic mail the plan's approval page to Illinois EPA for their signature. If you have any questions regarding the plan, please contact me at 412-921-8984.

Sincerely,

Corey A. Rich, P.E.  
Project Manager
