Re: Feasibility Study for Site 12
Harbor Dredge Spoil Area
Naval Station Great Lakes
Great Lakes, Illinois

0971255048 -- Lake County
Naval Station Great Lakes
Superfund/Technical File

Dear Ms. Montegross:

The Illinois Environmental Protection Agency (Illinois EPA or Agency) is in receipt of the Navy's *Final Feasibility Study for the Site 12 – Harbor Dredge Spoil Area, Naval Station Great Lakes, Great Lakes, Illinois*. It was received via electronic mail on October 26, 2015. The Feasibility Study Report (FS) describes the formulation and evaluation of remedial alternatives for contaminated soil and groundwater at Site 12 and is based upon data collected during the Remedial Investigation/Risk Assessment.

Illinois EPA reviewed the Draft version of this document and provided comments in letters dated June 2, 2014 and June 16, 2014. The Navy provided responses to those comments and redline/strikeout versions of the revised report for Agency review. The Agency has conducted a review of the Navy's final version of the report and has verified that the proposed revisions have been incorporated into the final document as indicated. Therefore, Illinois EPA can now concur with the contents of the submittal as written. As requested, Agency personnel have signed the appropriate page and are herein returning said page for inclusion in the final document.

If you have any questions regarding anything in this letter or require any additional information, please contact me at (217) 557-8155 or via electronic mail at brian.conrath@illinois.gov.

Sincerely,

Brian A. Conrath
