Re: Final Water Area Munitions Study - TSA Ranges

Dear Mr. Kirsch:

Enclosed is a copy of the Final Water Area Munitions Study (WAMS) for the Trap, Skeet and Archery (TSA) Ranges. The WAMS document follows the methodology of the Preliminary Assessment, using the CERCLA process under the Munitions Response Program. This program, established under the Defense Environmental Restoration Program, addresses munitions and explosives of concern, discarded military munitions and munitions constituents.

The WAMS report provides information gathered from historical research, site reconnaissance and records review. This study is limited to the land portion of the site and may be used for informational purposes only. **This report should not be distributed to stakeholders or the general public for review.** If you have any questions, please call me at (614) 888-4953.

Very truly yours,

MALCOLM PIRNIE, INC.
