Mr. Dinesh Vithani  
DEQ, Waste Division  
629 East Main Street  
Richmond, VA 23219

Dear Mr. Vithani:

We appreciate your comments on the proposed habitat enhancement project at the former Amphibious Base Landfill (Site 7). In response, I would like to clarify some issues. Site 7 is non-developable with respect to building occupied structures. However, the baseline risk assessment prepared as part of the Remedial Investigation/Feasibility Study (RI/FS) supports habitat enhancement and passive recreation opportunities. This will be addressed in more detail in the upcoming detailed Feasibility Study being prepared for Site 7. We look forward to moving forward with the habitat enhancement project and we will keep you well informed regarding future progress of this site.

Sincerely,

A handwritten signature in black ink, appearing to read "R. D. Rotz".
