Subject: Fw: Newport - Tech Memo - Supp RI Site 08, NUSC

Maritza -

Thank you for the opportunity to review the Technical Memorandum - Supplemental Remedial Investigation for Site 08, Naval Undersea Systems Center (NUSC).

The document is well-presented and adequately addresses the SRI implications, relative to ecological concerns. We have no further comments on the SRI related to ecological concerns, unless EPA and RIDEM wish to discuss specific issues.

We are interested in further discussions regarding the Feasibility Study for remediation of Site 08, NUSC, when all RI/SRI issues are resolved. Please keep us informed of ongoing FS discussions and progress with the site as it evolves.

Best regards,

Ken Munney
