**RE: Final Sampling and Analysis Plan (SAP)
IR Site 22 (OU 10), Carr Point Storage Area
Naval Station (NAVSTA) Newport, Rhode Island**

Dear Mr. Lovely and Ms. Crump:

On behalf of the Naval Facilities Engineering Command (NAVFAC), Mid-Atlantic (MIDLANT), Resolution Consultants is pleased to provide this final Work Plan. This Remedial Investigation (RI) Work Plan has been prepared in the form of a Sampling and Analysis Plan (SAP) for the proposed field investigation at IR Site 22.

As discussed in prior meetings including our discussion on April 16, 2014, the field work will include PCB analysis of samples located near areas of historic storage of PCB materials. And, there will be an opportunity for a site visit prior to sampling efforts, once brush clearing and access to the proposed locations are conducted. There will also be weekly e-mails of planned field activities to provide additional opportunities to participate in the field program.

Resolution Consultants contacts for this project will continue to be Neil Thurber, CTO Manager (781.224.6352) and Mark Kauffman, Activity Coordinator (978.905.2262). Please direct formal correspondence to Maritza Montegross (757.341.2013), and contact any of us with questions or clarifications as we prepare for the field program.

We look forward to working with you on this program.

Sincerely,

A handwritten signature in cursive script, appearing to read "Neil Thurber".
