Contract Task Order WE055

Subject: Draft Proposed Remedial Action Plan for Sediment at Area A Wetland - Site 2B
Naval Submarine Base-New London, Groton, Connecticut

Dear Mr. Gravette:

Please find enclosed two hard copies of the subject document for your review and comment. An electronic copy was also e-mailed to you today. Copies of the Proposed Plan were also distributed to the other members of the Naval Submarine Base – New London team per the distribution list provided below for their review and comment.

The Proposed Plan captures the agreements made during comment resolution on the Remedial Investigation (RI) Update/Feasibility Study (FS) for Area A Wetland – Site 2B. After the Navy receives concurrence from EPA and CTDEP regarding the meeting/conference call minutes and responses to regulator comments, Tetra Tech will issue red-line pages of the RI Update/FS report for regulatory review and concurrence. Tetra Tech will submit the final RI Update/FS report after the Navy receives concurrence from EPA and CTDEP that the changes are acceptable. Because the final RI Update/FS report needs to be submitted before the final Proposed Plan can be issued, the dates for the public comment period and public meeting/hearing may change based on the submittal date for the final RI Update/FS report. Therefore, the various dates in the Proposed Plan are highlighted in yellow because they are tentative, and can be adjusted based on the team's schedule.

Although the Navy acknowledges that the FFA allows for a 60-day regulatory review, the Navy is requesting that the regulators please provide comments no later than April 23, 2010 because of the tight schedule. If you have any questions regarding the enclosed document, please contact me at (412) 921-8433.

Sincerely,

Aaron Bernhardt
Project Manager

Enclosure(s)

- c: Ms. Kymberlee Keckler, EPA Region 1 (5 copies/electronic copy via e-mail)
