Contract Task Order WE57

Subject: Draft Lower Subbase (Operable Unit 4) Soil and Groundwater Completion Report and Feasibility Study Addendum
Naval Submarine Base-New London, Groton, Connecticut

Dear Mr. Gravette:

Please find enclosed two hard copies and two electronic copies (CDs) of the subject document for your review and comment. Copies of the document were also distributed to the other members of the Naval Submarine Base – New London team per the distribution list provided below for their review and comment.

The enclosed document includes the following information:

- Volume I – Sections 1 through 6 (Text, Tables, and Figures)
- Volume II – Appendices A through E
- Volume III – Appendices F through K

The Lower Subbase Soil and Groundwater Completion Report and Feasibility Study (FS) Addendum was prepared using the data collected under the Lower Subbase Soil and Groundwater Pre-Design Investigations to augment the final Lower Subbase FS. The information provided in both the Lower Subbase FS and FS Addendum will be used to support selection of remedial alternatives in the Proposed Plan and Record of Decision.

Also attached to this distribution letter are the errata sheets required for the final Lower Subbase FS (December 17, 2010). The issues raised by the Environmental Protection Agency (EPA) on January 13 2011 were addressed per the January 25, 2011 response-to-comment document issued previously via email. Errata sheets are being issued in lieu of making changes to the final FS.

Comments on the enclosed draft Lower Subbase Soil and Groundwater Completion Report and FS Addendum are requested by May 12, 2011 (60 days). If you have any questions regarding the enclosed document, please contact me at (412) 921-8984.

Sincerely,

Corey A. Rich, P.E.
New London Base Coordinator/Project Manager
