Contract Task Order WE57

Subject: Draft Final Pre-Design Investigation SAP for Soil at Lower Subase
Naval Submarine Base-New London, Groton, Connecticut

Dear Mr. Gravette:

Please find enclosed two electronic copies (CDs) of the subject Sampling and Analysis Plan (SAP) for your review and concurrence. Changes to the document were made in track-change mode to better facilitate review of the changes. Electronic copies of the document were also distributed to the other members of the Naval Submarine Base – New London team, per the distribution list provided below, for their review and concurrence.

Comments received from the Connecticut Department of Environmental Protection (CTDEP) and Environmental Protection Agency (EPA) were addressed during preparation of draft final SAP in accordance with the following response-to-comment documents:

- Responses to CTDEP's May 12, 2010 Comments on the Draft Sampling and Analysis Plan for the Pre-Design Investigation for Soil at the Lower Subase (Initial Issue: May 21, 2010; DEP Initial Rebuttal: June 21, 2010).
- Responses to EPA April 13, 2010 Comments and May 28, 2010 Rebuttals on the Draft Sampling and Analysis Plan for the Pre-Design Investigation for Soil at the Lower Subase (Initial Issue: May 18, 2010; Revision 1: June 15, 2010).

The primary focus of the field work associated with the SAP is to collect and analyze additional soil samples to address gaps in the soil database for Zones 1 through 7 at the Lower Subase. Installation Restoration Program Sites 10, 11, 13, 17, 19, 21, 22, 24, and 25 are located in these zones. Tetra Tech will initiate the field work for this project after finalization of the SAP, hopefully before the end of August 2010. If you have any questions regarding the enclosed SAP, please contact me at (412) 921-8984.

Sincerely,

Corey A. Rich, P.E.
New London Base Coordinator/Project Manager
