SAMPLING AND ANALYSIS PLAN DATA GAP INVESTIGATION FOR THE FORMER TANK
FARM SITE 23 FORMER TANK FARM NSB NEW LONDON CT

1/15/2015
U S NAVY

**NAVY RESPONSES TO EPA COMMENTS (VIA EMAIL) DATED JANUARY 02, 2015
DRAFT FINAL SAMPLING AND ANALYSIS PLAN - DATA GAP INVESTIGATION FOR THE FORMER
TANK FARM (SITE 23) AT NAVAL SUBMARINE BASE – NEW LONDON (Dated December 17, 2014)
GROTON, CONNECTICUT**

Issued: January 15, 2015

p. 18-2, §18	<p>Comment: Regarding p. 18-2, Section 18: typically duplicates are collected every ten samples not every 20 samples as proposed. While MS/MSDs are often collected every 20 samples, EPA requested every ten samples because two separate areas will be investigated.</p> <p>Response: Agreed, the table will be revised to include a field duplicate and an MS/MSD from each of the areas – one from OT-4 and one from OT-10.</p>
